Re: Collection of sediment samples from Duwamish River submerged lands

Dear Ms. Bender;

You will find included two maps delineating property boundaries for Ash Grove Cement Co. located at 3801 East Marginal Way So. Seattle, WA 98134. In our conversation yesterday, Ash Grove Cement Co. requested a split of any samples taken from it's small section of property submerged by the Duwamish River and a copy of the analysis results of these sediment samples.

Further, Ash Grove requests the date and approximate time that samples, if any, will be taken from it's property and a copy of the analysis protocol used to establish the presence and extent of hazardous substances including (PCB, PCT and TOC).

Thank you for your assistance.

Yours truly,

Gerald J. Brown  
Safety and Environmental Manager
